

Winter Lakes High School 2021 - 2022

Drone Video Syllabus

Drone Video Class is a Winter Lakes C/A/L Credit Class that allows students to receive credit for making drone videos about **their lives, our school, and/or your community**. The course has no start or stop date, but rather a work complete grade (Pass/No Pass). Once students have produced 10 videos that could be included on the “White Wolves of Coquille” Youtube Channel then they will receive 50 quarks (5 quarks/video), and therefore a credit.

Also, you can receive 3 quarks for attendance. You must be in the google classroom or complete an outline from the recording, if you want attendance quarks (3 quarks x 17 sessions = a credit).

Lastly, if a student produces a video about **their lives, our school, and/or their community** and it receives more than 1000 views or is purchased by a local business for more than \$100, they will immediately receive a credit.

During our Monday & Thursday LIPI Sessions, we will discuss how to make creative and successful videos (more than 100 views on Youtube). We will be using High School Visual Arts Standards as a basis for our discussions. I emphasize Standard 3. Creating, Refining, & completing artistic work as a process one must use over time to develop their art.

If you have questions about this course, please come to Drone Video LIPI Sessions, Monday & Thursday from 9:30-10:30 and ask your question so others can benefit from your curiosity.
